L4

L4 - Clone GitHub repository using Visual Studio Code IDE

To clone a GitHub repository using Visual Studio Code on Windows, first → **Open Visual Studio Code** on your computer → Ensure **Git** is installed by running ***"git --version"*** in the command prompt if not, install it from the website → Press **Ctrl + Shift + P** to open the **Command Palette** → In the Command Palette, type ***"Git: Clone"*** and select it → Paste the GitHub repository URL **(e.g., "https://github.com/username/repository.git")** in the box and press Enter → Choose a location for the repository by selecting a folder and clicking **Select Repository Location** → Repository is cloned, now VS Code will ask if you'd like to open it click **Open** → Now you can start editing.
